Chapter: The ECOMM put forth the following as GOALS for last fall.:

- Complete renovations to the Chapter storage room in the Armory and tool reorganizations.
- Continue to promote public awareness of Alpha Phi Omega.
- Continue the development of the RPI community service exchange, where Epsilon Zeta will act as a broker in arranging for RPI students to participate in community service.
- Prepare an informational booklet on EZ for the National Convention of December, 1986.
- Assess EZ's insurance/liability coverage/risk level.
- Maintain the Chapter Office between 9 to 5 on Monday through Friday.
- Complete Chapter PC software development project.
- Evaluate the Pledging Program on its execution.

Service: Numerous projects were run this fall. Starting off, we aided Freshmen in moving in and ran Trivia for Student Orientation. We helped the administration by performing schedule distribution, envelope stuffing, and Check-In. Although delayed, Operation ID ran successfully. In the outdoors, we held the Circle the Wagons Camporee at Grafton Park, the Overnighter at Camp Shad-A-Muc, and a project at Camp Saratoga. For Halloween, we helped with the Monster March parade and party at the Troy Atrium. Vacation Travel Services (Buspool) was overhauled and successfully implemented. EZ also assisted the Disabled Fair in the Rensselaer Union and the perennial Clothe-A-Child campaign. Several smaller projects were also run to distract us from the tedium of school. This spring promises much excitement, for this is the year of MMOC!

Fellowship: A varied fellowship program provided frequent relief from the academic pressures of RPI. Parties started early with a rush party in the Rensselaer Union and a room party. New events included the silly party, the anachronism party, the mellow party, and a bring-a-musical-instrument-whether-you-can-play-it-or-not-party. Pledge-brother interaction was rampant. The pledges ran a mock Brotherhood meeting and a very successful Gong Show.

Sports: In Ocqui, the Puckoffs are 2-1-1 with veteran Gary Saulnier, now a professor at RPI, in goal.
